```cpp
1  #include "Customer.h"
2  #include <iostream>
3  #include <string>
4
5  using namespace std;
6
7  Customer::Customer(void) {
8
9      setfName();
10      setlName();
11  }
12  void Customer::setfName(void) {
13
14      cout << "Enter first name :";
15      cin >> fname;
16
17  }
18  void Customer::setlName(void) {
19
20      cout << "Enter last name :";
21      cin >> lname;
22
23  }
24  string Customer::getfName(void) {
25
26      return fname;
27
28  }
29  string Customer::getlName(void) {
30
31      return lname;
32
33  }
```
